Third-party Integration	CRM, DAM, OpenSearch, Google APIs

Professional Experience

Senior Drupal Developer

Queensland Police

Mar 2023 – Current

Senior Drupal developer with *Queensland Police*, contract role.

Providing full stack development support, working in an agile team, mainly focus on develop and create customising theme/modules and also using his knowledge to provide different Drupal related development advise,

- Successful timely completed a new website building of Marine Rescue Queensland from Figma: <https://www.mrq.qld.gov.au/>, created custom modules/theme, using Paragraph layout, View, Taxonomy etc. Providing site support, feature function adding for <https://www.police.qld.gov.au/>, <https://www.fire.qld.gov.au/>, <https://www.protectiveservicesgroup.qld.gov.au/>
- Optimized frontend performance using React.js components integrated with Drupal via GraphQL
- Designed and implemented custom GraphQL APIs with OAuth2 authentication for secure data exchange
- Established comprehensive testing framework using PHPUnit, Cypress and Selenium for regression testing
- Collaborated in ****agile sprints**** to deliver AA-compliant responsive designs, reducing page load time by 40% via AWS S3 asset optimization.
- Creating/Upgrading custom modules, theme, develop the replacement of unsupported modules, providing support to build/changing different webforms, making all of pages mobile friendly and meeting AA/AAA standards, working with DevOps team to change Pipeline rules for different environments, using .Net skills to create/build different webform pages etc.

Senior Drupal Developer

Service Australia

Jan 2022 – Feb 2023

Key Achievements:

- Successfully led a major platform upgrade from Drupal 8 to Drupal 10 for [JobAccess.gov.au](https://www.jobaccess.gov.au), delivering accessibility-compliant, mobile-first pages through redesigned paragraph-based layout architecture.
- Directed **SharePoint-to-Drupal migration** for internal staff collaboration systems, mapping document libraries and metadata into custom Drupal content types and views.
- Integrated enterprise-wide Single Sign-On (SSO) via OAuth2 for both internal and external systems.

- Improved deployment efficiency with GitLab CI/CD automation and AWS CloudWatch alerts, achieving zero-downtime releases.

Responsibilities:

- Liaised with cross-functional stakeholders to assess SharePoint workflows and designed equivalent Drupal structures.
- Migrated legacy SharePoint libraries and permissions into decoupled Drupal content model.
- Upgraded custom modules and replaced deprecated dependencies to support Drupal 10 compliance.
- Coordinated release management across environments using GitLab and CloudFormation scripts.

Senior Drupal Developer

Dec 2020 – Dec 2021

Digital Transformation Agency

Senior Drupal developer with Digital Transformation Agency, contract role.

Mainly doing front and back-end development, working within a multi-disciplinary team to build and deliver features for Digital Profession websites, make accessibility fixes to Drupal sites, help with testing and troubleshooting: (GovCMS) <https://dta.govcms.gov.au/> (<https://www.dta.gov.au/>)

Key Achievements:

- Enhanced **GovCMS platform** (Drupal SaaS) with accessibility optimizations to meet WCAG 2.1 AA standards.
- Delivered multiple features for the Digital Profession using component-based theming and reusable layout structures.
- Integrated third-party Digital Asset Management (DAM) systems via custom APIs, improving asset governance.

Responsibilities:

- Worked in a SAFe Agile environment with product owners, testers, and accessibility experts to deliver and iterate on production-ready features.
- Contributed directly to the GovCMS core codebase, addressing performance and caching enhancements for national-scale websites.
- Configured GitLab CI/CD rules for multisite deployment automation, aligning with DevSecOps policies.

Senior Drupal Developer

Jan 2020 – Dec 2020

Geoscience Australia

Senior Drupal developer with Geoscience Australia, contract role.

Mainly doing front and back-end development for the metadata hub for Geoscience Australia's Earth and marine observation data products (**Drupal 9**): <https://cmi.ga.gov.au/>, providing Drupal AWS support (EC2/S3/Elastic beanstalk..).
